

**California DUI Program Exit Status Benchmarks by County
(FY 1994/95 FY2013/14)**

Note to Readers: Data compiled here are based on the quarterly summary reports submitted by individual DUI programs to the state oversight agency, Department of Health Care Services (DHCS), from FY1994/95 to FY2013/14. The county benchmarks in this document represent that totality of all data reported to DHCS from all DUI programs. Three exit status measures are presented here: Completion, Termination, and Transfer-Out. The rate of completion (Comp_rate), termination (Term_rate), Transfer_out rate (X_rate) is the proportion of an exit status among the total exits; thus the totality of all three exit measures should add up to 100 percent.

Since DUI programs vary by type across California, only the five most frequently used programs are included in this report: First Offender, 18-Month, 6-Month, 9-Month, and Wet Reckless. Three types of benchmarks are presented here: historical (all date are included); 5-year; and annual.
